

## Jamie Webb

It gives me such joy to be part of the Timbernook program during the summer months. I have lived in the MWV since 2002 with my husband/outdoor buddy. The AMC and the outdoor playground of the White Mtns brought us here and we still enjoy the valley and our precious fur babies.

During the school year I work as a special education paraprofessional. When I am not in school, I love skiing, paddleboarding, reading, biking, swimming, and exploring the forests or old cellar holes.

I originally went to Sterling College for outdoor education and my passion for working with children outdoors has never ceased. I went to Granite State College to get my BS in Early childhood EDU in the early 2000's and have worked in public schools since.

My most recent studies for the Nature Based Early Childhood Edu certificate are almost complete at Antioch University! I truly believe children learn best when outdoors with peers and working with their hands. The forest is where I truly feel alive and it's a dream really to have connected with Timbernook.
